

Moose

By Dax

Moose are very big animals. They are brown. They have big antlers.

They eat  
twigs, bark, roots and  
leaves. Their predators  
are people, wolves and  
bears.

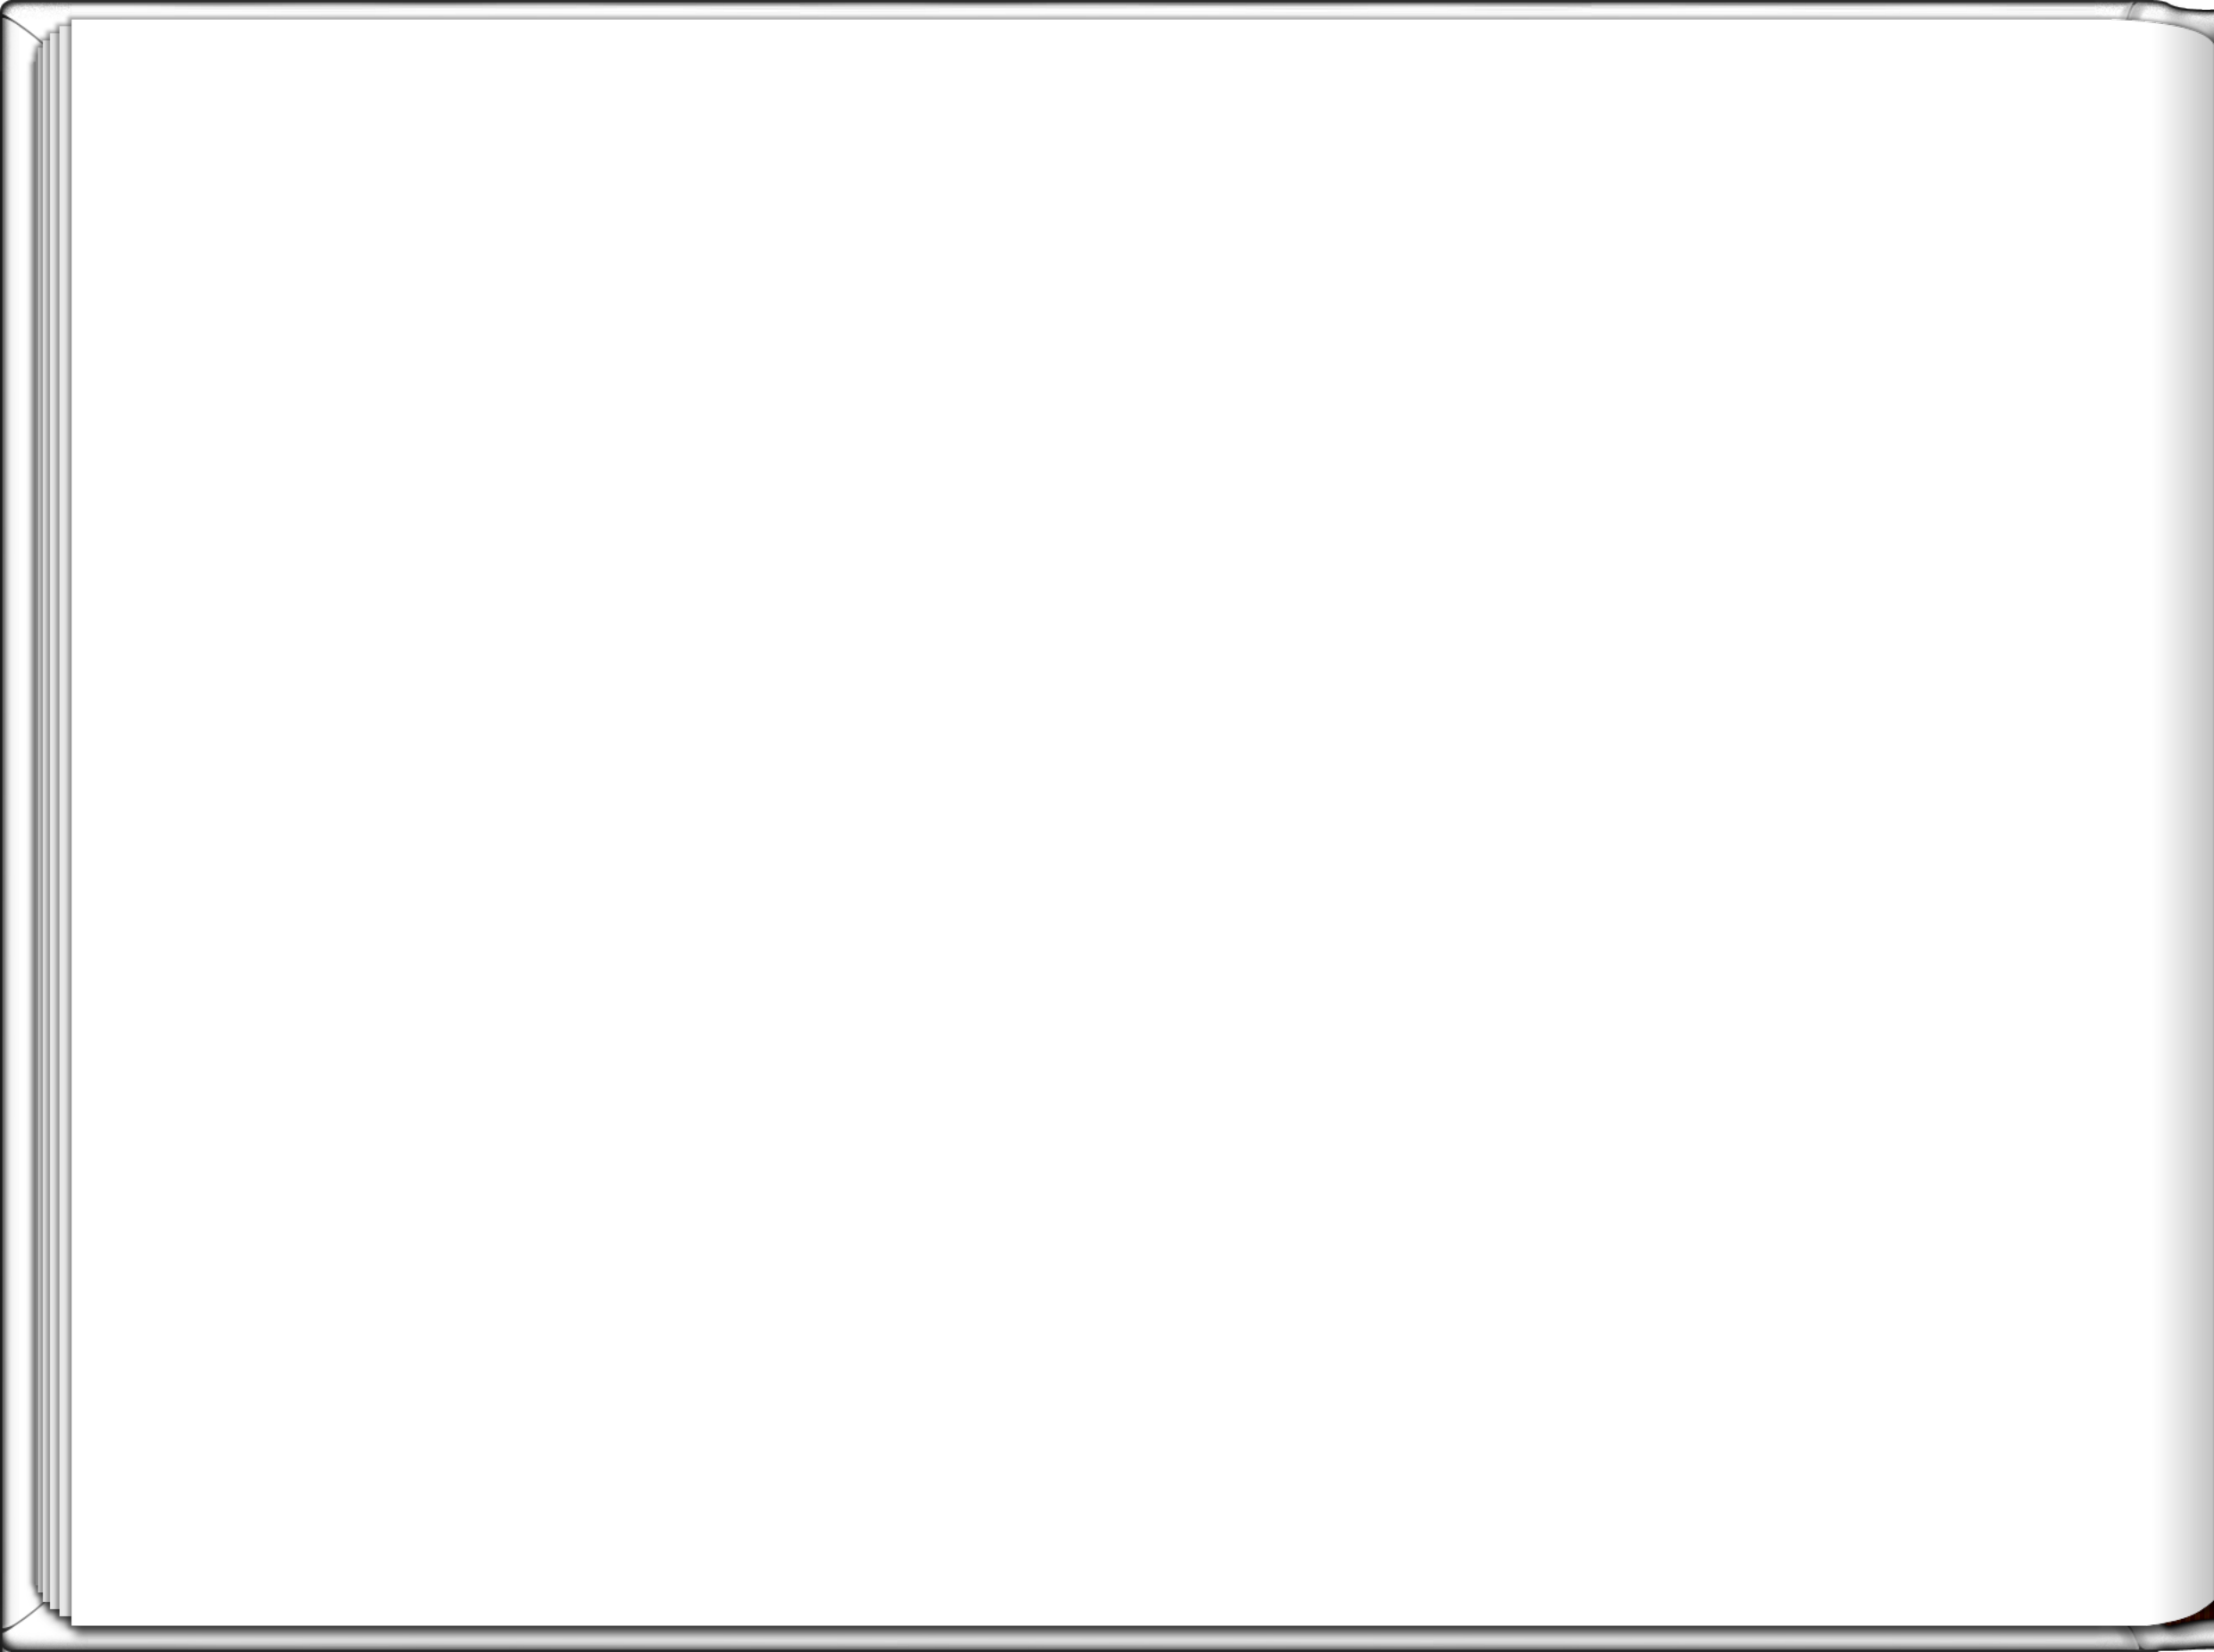

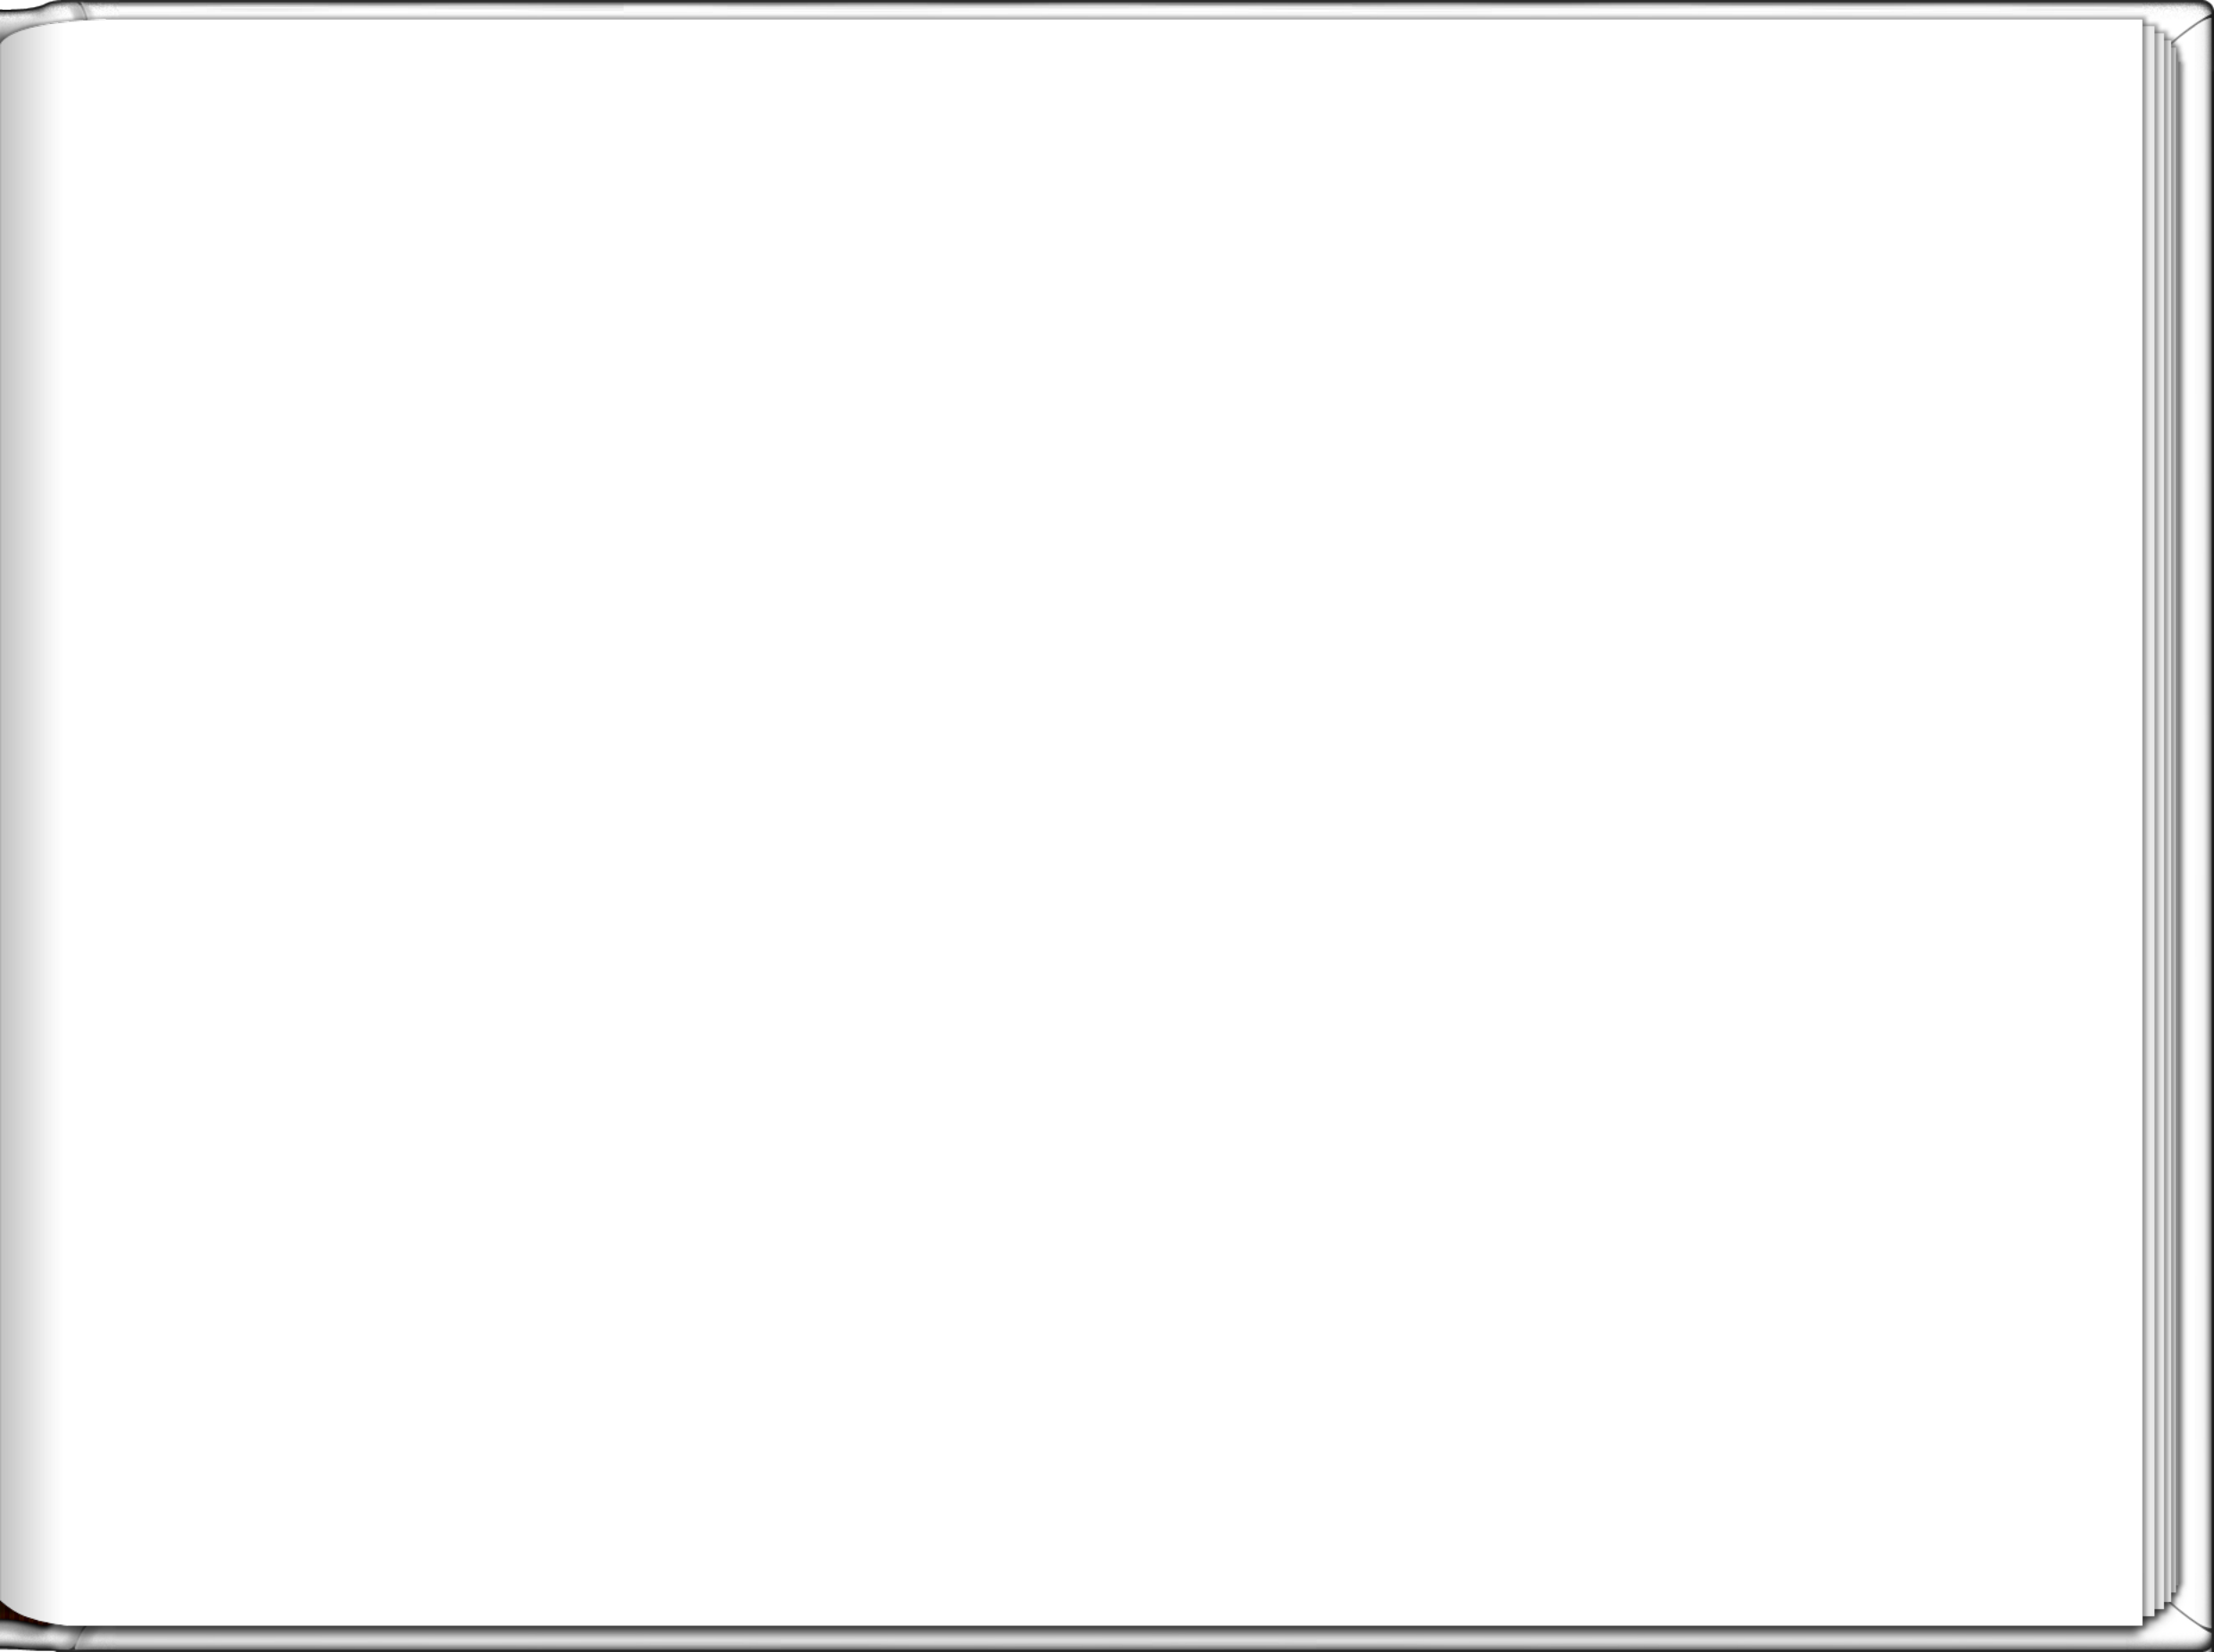

They can live in  
Alaska, Colorado, Michigan  
and New England. It likes  
cold places. It lives close  
to lakes.

It is the largest in the deer family. They can run fast. They have a small tail and a thick coat of brown fur.
